

CANCELLATION EXPOSURE

INC-LH1234-2026-08-29

LH1234 XXX-FRA, TECHNICAL_AOG, manifest read as CSV, 121 passengers in 80 parties plus 6 crew. Flight number read from the manifest.

Station may commit

Inside the station mandate. The station can commit the care spend without carrier authorisation.
Worst case care 21.193 EUR against a station limit of 25.000 EUR.

What this night costs

	Low	Expected	High
Passengers who get home	0	0	0
Rooms including crew	67	75	82
of which accessible	3	3	3
Accommodation	6.633 EUR	8.925 EUR	12.218 EUR
Self serve reimbursement	1.080 EUR	2.310 EUR	3.640 EUR
Meals	1.524 EUR	2.286 EUR	3.175 EUR
Transport	1.100 EUR	1.650 EUR	2.160 EUR
Care total, Article 9	10.337 EUR	15.171 EUR	21.193 EUR
Compensation liability, Article 7	48.400 EUR	48.400 EUR	48.400 EUR
Total accrual	58.737 EUR	63.571 EUR	69.593 EUR

Care is owed even if the carrier establishes extraordinary circumstances. Compensation is not. Compensation is currently assessed as due. Re-routing arrival delay of 14 hours exceeds the Article 7(2) threshold of 3 hours, so the full amount applies.

Who could go home, and how many did

Derived from the booking: 0 of 121 passengers have a booking that begins at BCN. After removing connecting passengers, unaccompanied minors and anyone needing an accessible room, 0 could get themselves home. Set by a person: 35 percent of them are expected to manage it tonight, which gives 0 passengers who need no room.

- A passenger is based at this station when the first flight of their booking departs from it. That is the trip origin, not a residential address.

- Trip origin says who could go home. The rate set on the review screen says how many of them actually do, which depends on the hour, the ground transport and how wide the catchment is.
- Connecting passengers, unaccompanied minors and anyone needing an accessible room are never counted as going home, whatever their trip origin.

How much to trust these numbers

- No trip origin column found, so nobody can be identified as based at this station. Everyone is assumed to need accommodation, which is the conservative case.
- No trip origin was available, so nobody is treated as based at BCN. Every passenger is costed as needing a room.

What the model was given

The payload below is the complete and only input given to the language model. It was constructed field by field, not copied from upstream state, and it was scanned for identifiers before the call. Payload size 1361 bytes. 28 identifier and collection patterns checked, none found.

- Passenger names are read and discarded in this node. They are never written to workflow state and never reach any model.
 - PNR and record locator are replaced by a party key hashed with a per execution salt. The key groups a family into one room and means nothing outside this run.
 - Reduced mobility is carried forward only as needsAccessibleRoom, an operational room requirement, not as a health record.
 - Trip origin is kept as a three letter airport code. It says where a booking began, not where anybody lives.
- Show the exact payload

Briefing for the carrier

Flight LH1234 (XXX-FRA) cancelled 2026-08-29T19:40 due to TECHNICAL_AOG; reroute arrival delay 14 hours.

Passengers 121, Crew 6 (Connecting passengers: 40).

Rooms expected 75 (worst 82), accessible 3 — differs from 121 passengers because rooms are allocated per party (partyCount 80).

Care cost range EUR 10,337 — EUR 21,193 (expected EUR 15,171).

Compensation gross liability EUR 48,400 (EUR 400 per pax); eligible: true — contest status not indicated; reason: reroute delay 14h exceeds Article 7(2).

Decision needed now: confirm whether to escalate/approve costs beyond station commitment limit EUR 25,000 (authorisation: STATION).

Single biggest uncertainty: EU261 compensation eligibility (driver swing EUR 48,400).

Warning: no trip origin data so everyone is assumed to need accommodation; figures are conservative and room needs may be overstated.

What moves the number

1. **EU261 compensation eligibility**, swing 48.400 EUR. Binary. If the carrier establishes extraordinary circumstances this goes to zero. Nothing the station does moves it.
2. **Claim rate on compensation**, swing 24.200 EUR. Cash timing only. The liability is booked either way.
3. **How many of the locally based get home tonight**, swing 5.585 EUR. Who could go home is derived from the booking. How many actually do is the judgement set on the review screen.

Handover to hotel sourcing

Rooms required 75, of which 3 accessible. Worst case 82 rooms. Latest check in 23:30. Care budget ceiling 21.193 EUR.

Unit costs and the accept and claim rates are unverified assumptions. Synthetic manifest data only.
